11:38 AM

GOOD MORNING CALL
ME BE,FOR WORK

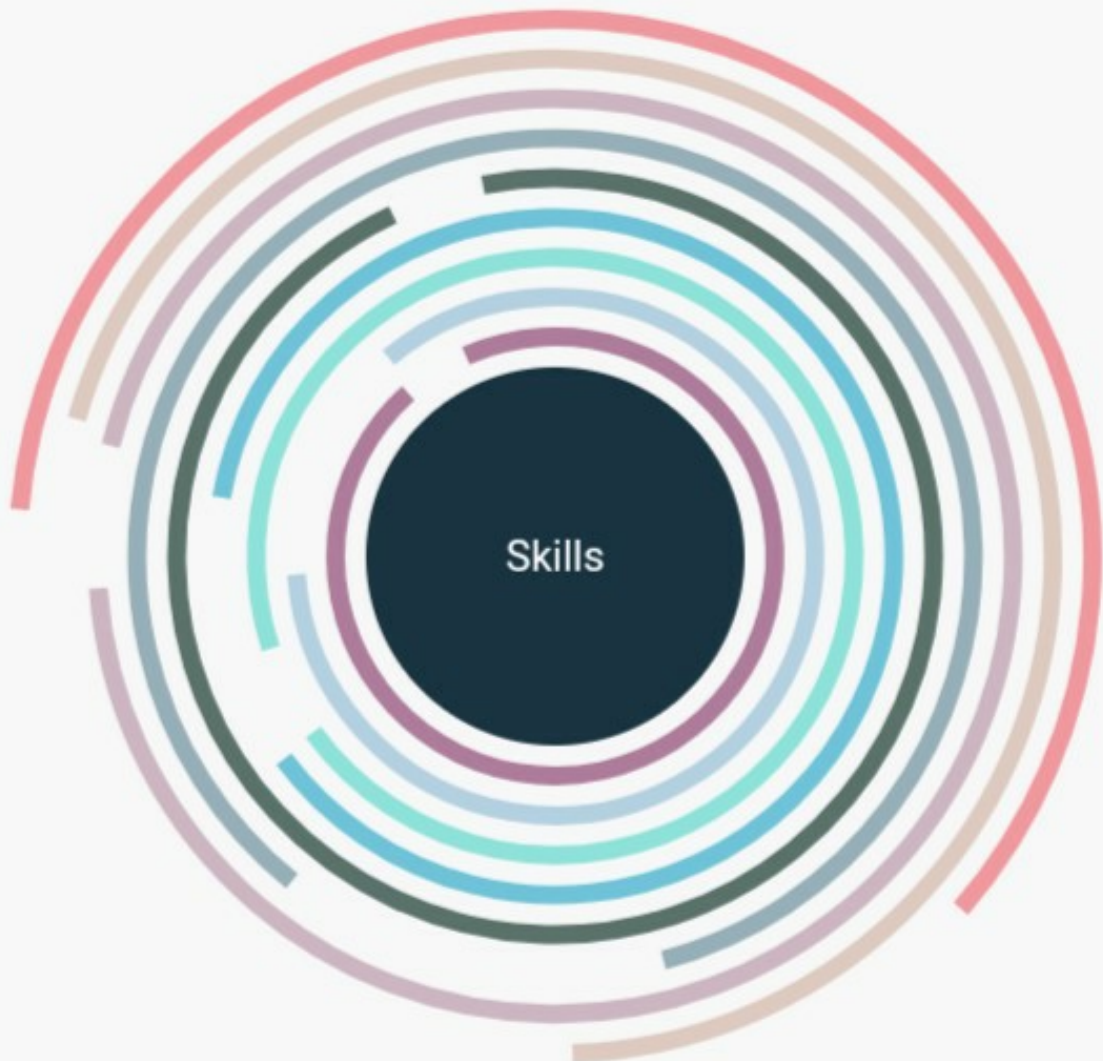

● **Freelance:** I am available

@narayanprusty

Hi, I am a developer, speaker, writer
and consultant - focusing on

HTML5, JavaScript, WordPress, Blockchain and
Cordova. You can outsource your website or
mobile app development to me.

Let's get started

HIRE ME →

Try:

- Checking the network cables, modem, and router
- Reconnecting to Wi-Fi
- Running Connectivity Diagnostics

DNS PROBE FINISHED NO INTERNET

The screenshot displays the Chrome DevTools interface. The top navigation bar includes tabs for Elements, Console, Sources, Network, Performance, Memory, Application, Security, and Audits. The 'Console' tab is active, showing a network error from 'body#t.neterror.offline'. The error message is 'There is no Internet connection'. The console also shows a 'script' error.

The 'Elements' panel on the left shows the HTML structure of the page. The main content area is a 'div' with the class 'main-content'. It contains a 'div' with the class 'icon icon-offline' and a 'div' with the class 'main-message'. The 'main-message' contains a heading 'There is no Internet connection' and a paragraph 'Try:'. The 'Try:' paragraph contains a list of suggestions: 'Checking the network cables, modem, and router'.

The 'Styles' panel on the right shows the default styles for the 'body' element, including 'background-color: #f5f5f5', 'color: #212121', and 'font-size: 16px'. The 'Computed' tab shows the 'display: none' style for the 'main-message' element.
